

Ch 1: Development

Question Bank | 2M | 3M | 5M

SECTION A - 2 MARKS

Q1. What is development? Give two features of development.

Q2. What is per capita income? How is it calculated?

Q3. Define Literacy Rate. *(PYQ 2024)*

Q4. Define Infant Mortality Rate. *(PYQ 2021)*

Q5. Define Net Attendance Ratio. *(PYQ)*

Q6. Define Life Expectancy. What is the life expectancy in India?

Q7. What is BMI? What does it measure?

Q8. What is the Human Development Index? Who publishes it? *(PYQ 2023)*

Q9. How does the UNDP's developmental criterion differ from the World Bank's? *(PYQ 2024)*

Q10. What does the World Bank use to classify countries as rich or developed?

Q11. What is sustainable development? (PYQ 2023)

Q12. What are non-renewable resources? Give one example.

Q13. Give one example to show that what may be development for one may be destructive for another. (PYQ 2012)

Q14. Name two developmental goals of a landless rural labourer.

Q15. Name two developmental goals of a prosperous farmer. (PYQ 2023)

Q16. Name two developmental goals of a factory worker. (PYQ 2023)

Q17. Give one reason why averages hide disparities. (PYQ 2022)

Q18. Suppose four families have an average per capita income of Rs. 10,000. If three families earn Rs. 6,000, Rs. 8,000, and Rs. 14,000 respectively, what is the income of the fourth family? (PYQ 2022)

Q19. What is the Public Distribution System? Give one example of a public facility.

Q20. What is a public facility? Why are public facilities important for development?

Q21. Which region of the world has the largest crude oil reserves?

Q22. Name any two parameters used by UNDP to measure Human Development. (PYQ 2023)

Q23. What is sex ratio? What does a low sex ratio indicate?

Q24. Differentiate between economic growth and economic development in two points.

Q25. What are conflicting development goals? Give one example. (PYQ 2012)

Q26. What are common development goals? Give one example. (PYQ 2012)

Q27. Which one of the following is a developmental goal of the factory workers — better wages, better technology, more hours of work, or more labour work? Justify. (PYQ 2023)

Q28. Which groups of people are likely to have the most conflicting developmental goals — tribals and industrialists, or small and large farmers? Give a reason.

Q29. What is meant by 'quality of life'? Name two indicators used to measure it.

Q30. What is GNI? How does it differ from per capita income?

Q31. Name two countries with high HDI ranking. Name two with low HDI ranking.

Q32. Why is Kerala considered more developed than Punjab despite having lower per capita income?

SECTION B - 3 MARKS

Q1. Why is per capita income not an adequate measure of economic development? Give three reasons. (PYQ 2024 — High Probability)

Q2. Differentiate between Human Development Index and Per Capita Income as indicators of development. (PYQ 2023 Compartment)

Q3. Explain the concept of sustainable development with three examples. (PYQ 2022)

Q4. Why do different people have different developmental goals? Explain with three examples. (PYQ 2022)

Q5. Explain common, different, and conflicting developmental goals with one example each. (PYQ 2012)

Q6. Explain how development goals and aspirations differ among landless rural labourers, poor farmers, and prosperous farmers.

Q7. Why do we use averages in comparing development? What are the limitations of averages? (PYQ)

Q8. Explain any three social indicators of development other than income.

Q9. Explain the importance of the Human Development Index in three points. (PYQ)

Q10. "Average income is an important criterion for development." Justify with three points.

Q11. Explain why sustainability of development is important. Give three reasons. (PYQ 2022)

Q12. "What may be development for one may not be development for the other." Explain with three examples. (PYQ 2012)

Q13. Explain with examples how overuse of natural resources can hinder development.

Q14. What are the three parameters used by UNDP to measure Human Development? Explain each briefly. (PYQ 2023)

Q15. How does per capita income hide income inequality? Explain with a numerical example. (PYQ 2022)

Q16. Explain any three public facilities that are essential for the development of a country. (PYQ 2012)

Q17. Explain three differences between developed and developing countries on the basis of development indicators.

Q18. Why is health considered an important indicator of development? Explain three points.

Q19. Why is education considered an important indicator of development? Explain three points.

Q20. Explain the role of income and non-income factors in measuring development. Give three non-income factors.

Q21. "Development goals may be common but the priorities differ." Explain with three examples from different sections of society.

Q22. How does the construction of a dam serve as an example of development being beneficial for some and harmful for others? Explain three aspects.

Q23. Explain how environmental degradation can become a barrier to sustainable development. Give three examples.

Q24. Explain three ways in which developing countries can achieve sustainable development without compromising economic growth.

Q25. Why does Kerala rank higher in HDI than many richer states of India? Explain three reasons.

Q26. What is the importance of sex ratio and literacy rate as indicators of development? Explain.

Q27. Explain the limitations of using per capita income as the sole criterion for development. Give three specific limitations.

Q28. Explain three reasons why developed countries have higher levels of health and education than developing countries.

Q29. How do public facilities like hospitals and schools contribute to the development of a country? Explain three points.

Q30. Explain how nations with similar per capita income can have vastly different levels of development. Use examples from the chapter.

Q31. How are development goals of a girl from a rich urban family different from a girl from a poor rural family? Explain three points. (PYQ 2024)

Q32. Explain how the Infant Mortality Rate, Net Attendance Ratio, and BMI together give a better picture of development than income alone.

Q33. Why is it important to consider both economic and non-economic factors while measuring development? Explain with three examples.

Q34. Explain the meaning and significance of Gross National Income as a measure used by UNDP.

Q35. Describe three goals that would be common to both a rich and a poor person while still having different priorities.

Q36. Explain how over-dependence on fossil fuels threatens sustainable development in India. Give three points.

Q37. How does the concept of development differ from the concept of growth? Explain three distinctions with examples.

Q38. Explain any three reasons why income alone cannot determine the standard of living of people in a country.

Q39. How do conflicting goals of tribals and industrialists create challenges for development policy in India? Explain three aspects.

Q40. Explain three features of a developed country with examples from the World Bank classification.

Q41. How can India achieve sustainable development while meeting the aspirations of its growing population? Suggest three measures.

Q42. Explain the concept of Human Development as distinct from economic development. Why did UNDP introduce this concept?

Q43. How do the developmental goals of urban and rural people differ in India? Explain with three specific examples.

SECTION C - 5 MARKS

Q1. Compare the developmental goals of a girl from a rich urban family and a girl from a poor rural family. (PYQ 2024)

Q2. Explain the concept of development as a mix of goals. Support with examples from different sections of society. (PYQ 2023 — *Most Important*)

Q3. What is sustainable development? Explain its importance in the context of environmental degradation. Give five examples of sustainable practices. (PYQ — most repeated)

Q4. What is development? Why do different people have different developmental goals? Explain with five examples. (PYQ 2021)

Q5. "Per capita income is not an adequate measure of economic development." Justify with five reasons. What better alternatives exist? (PYQ 2024)

Q6. How does the Human Development Index measure development? How is it different from per capita income? Explain the three parameters with examples. (PYQ 2023)

Q7. Explain how development goals may be common, different, and conflicting. Give two examples of each type. (PYQ 2012)

Q8. "Averages are useful but also have limitations." Explain this with reference to per capita income and development. Give a numerical example and explain what it hides. (PYQ 2022)

Q9. Explain what development means using the following sections of society: landless labourer, factory worker, prosperous farmer, poor urban woman, and a rich industrialist. What does this tell us about the nature of development?

Q10. Explain the importance of education, health, and income as indicators of development. How are they captured in the HDI? Why is HDI considered a better measure than per capita income?

Q11. "Development for one may be destruction for another." Justify this statement with five examples showing how development goals can conflict between different groups.

Q12. Explain the concept of sustainable development. Why is it important for countries like India? Give five specific measures India can take to ensure sustainable development.

Q13. Explain the role of public facilities in the development of a country. Give five examples of essential public facilities and explain how each contributes to development.

Q14. Compare India's development with two other countries using at least four indicators — per capita income, literacy rate, life expectancy, and HDI rank. What does this comparison reveal?

Q15. Explain how overuse and misuse of natural resources can become a barrier to development. Give five examples of resource depletion and their impact on future generations.

Q16. "Economic development without social development is incomplete." Justify this with five examples showing the importance of literacy, health, gender equality, and public facilities.

Q17. Explain the various criteria used to measure development — per capita income, HDI, literacy rate, infant mortality rate, and net attendance ratio. Which is the best single measure and why?

Q18. How do the development goals of people in different occupations — farmer, industrial worker, trader, teacher, and domestic worker — reflect the complex nature of development?

Q19. Why is it said that development must be sustainable? What are the consequences of unsustainable development? How can renewable energy and conservation help?

Q20. Explain the differences in development levels between India and a developed country like Germany or Sri Lanka using five indicators. What are the key challenges India faces in reaching that level?

Q21. "Income is necessary but not sufficient for development." Explain this statement with five arguments covering health, education, gender equality, environment, and social freedom.

Q22. Describe the developmental goals of five different groups — urban rich, urban poor, rural landowner, rural landless labourer, and urban woman — and explain how these goals are similar, different, and sometimes conflicting.

Q23. How does the concept of Human Development go beyond GDP? Explain using the three pillars of HDI and compare the HDI ranks of India with two other countries.

Q24. Explain why sustainability is considered the most important dimension of development in the 21st century. Give five specific environmental and resource-related challenges that threaten sustainable development.

Q25. "Development is a complex and multi-dimensional concept." Justify this statement by explaining five different dimensions of development — economic, social, political, environmental, and cultural — with examples.

Q26. Explain the developmental goals of different sections of Indian society and show how government policies on health, education, PDS, and employment try to address multiple development goals simultaneously.
