

Ch 1: Resources and Development

Question Bank | 2M | 3M | 5M

SECTION A - 2 MARKS

Q1. What is a 'Resource'? Give two examples. (PYQ 2015)

Q2. Distinguish between biotic and abiotic resources with one example each.

Q3. Distinguish between renewable and non-renewable resources with one example each. (PYQ 2021)

Q4. What are 'Potential Resources'? Give one example from India.

Q5. What is meant by 'Stock' in the classification of resources? Give one example.

Q6. What are 'Reserves'? How are they different from Stock?

Q7. What are individual resources? Give two examples. (PYQ 2014)

Q8. What are community-owned resources? Give two examples.

Q9. What are national resources? Name two examples including territorial waters.

Q10. What are international resources? Who regulates them?

Q11. Name two states where laterite soil is found. (PYQ 2022)

Q12. Name two states where alluvial soil is found. (PYQ 2021)

Q13. Name two states where black soil is found. What crop grows best in it? (PYQ 2024)

Q14. What is arid soil? In which states is it mainly found? (PYQ 2022)

Q15. What is meant by 'land degradation'? Name any two human activities causing it.

Q16. What is soil erosion? Name the two main agents responsible for it.

Q17. What is 'gully erosion'? Name two states where it is pronounced.

Q18. What is 'sheet erosion'? Where does it commonly occur?

Q19. What is 'resource planning'? Why is it necessary? (PYQ 2022)

Q20. What is meant by 'sustainable development'? (PYQ 2023)

Q21. What was Agenda 21? Where and when was it signed? (PYQ 2023)

**Q22. What is the main cause of land degradation in Punjab?
(PYQ)**

Q23. In which states has deforestation due to mining caused major land degradation?

Q24. Which human activity is the main cause of land degradation in Gujarat, Rajasthan and Madhya Pradesh?

Q25. What is contour ploughing? How does it help in soil conservation?

Q26. What is terrace farming? In which state is it commonly practised?

Q27. What is 'Cultivable Wasteland'? Give one example.

Q28. What percentage of geographical area should be under forest according to the National Forest Policy 1952?

Q29. "Resources are a function of human activities." Justify this statement in two points.

Q30. India's territorial water extends up to how many nautical miles from the coast?

Q31. What is red soil? Where is it mainly found in India?

Q32. Identify the soil that ranges from red to brown in colour and is saline in nature. (PYQ 2022)

SECTION B - 3 MARKS

Q1. Explain the classification of resources on the basis of ownership with examples. (PYQ 2024)

Q2. Describe any three features of arid soil. (PYQ 2024)

Q3. Explain the importance of conservation of resources. (PYQ 2023)

Q4. Distinguish between renewable and non-renewable resources with three points each. (PYQ 2021)

Q5. Explain any three human activities responsible for land degradation in India. (PYQ 2021)

Q6. Explain the classification of resources on the basis of origin and exhaustibility. (PYQ 2022)

Q7. Why is resource planning essential for a country like India? Explain three reasons. (PYQ 2022)

Q8. Suggest any two ways to solve the problem of land degradation in India. (PYQ 2024)

Q9. Explain the three stages of resource planning in India. (PYQ 2016-17)

Q10. Describe any three features of black soil. Why is it ideal for cotton cultivation?

Q11. Describe any three features of alluvial soil. In which regions of India is it found?

Q12. Describe any three features of laterite soil. Why is it not suitable for agriculture without treatment?

Q13. Explain how over-irrigation has led to land degradation in Punjab and Haryana.

Q14. Explain three factors responsible for the formation of soil.

Q15. How does mining cause land degradation? Explain with reference to specific states.

Q16. "India has enormous diversity in the availability of resources." Support with three examples. (PYQ)

Q17. What are the problems caused by indiscriminate use of natural resources? Explain three points.

Q18. Explain how Gandhiji voiced his concern about resource conservation. (PYQ 2016-17)

Q19. Distinguish between potential and developed resources with two examples each.

Q20. Explain any three measures of soil conservation in hilly areas.

Q21. What is the importance of soil as a resource? Explain three points.

Q22. Explain the land use pattern in India. What are the major categories of land use?

Q23. Why has land under forests not increased significantly since 1960-61? Explain three reasons.

Q24. "The earth has enough for everyone's need but not for everyone's greed." Explain this statement in relation to resource conservation with three points. (PYQ 2013)

Q25. Explain how shelter belts and strip cropping help in soil conservation.

Q26. Distinguish between stock and reserves. Give two examples of each.

Q27. How is over-grazing responsible for land degradation? Which states are most affected?

Q28. Explain any three ways in which running water and wind cause soil erosion in different regions of India.

Q29. What is the role of technology in resource development? Explain with examples.

Q30. Explain why some resource-rich regions of India remain economically backward.

Q31. Describe any three features of forest soil. In which regions is it found?

Q32. Explain the significance of the Rio de Janeiro Earth Summit 1992 in the context of resource conservation.

Q33. How can industrial effluents cause land degradation? What measures can check it?

Q34. Explain any three differences between individual resources and community resources.

Q35. What is the role of resource planning in achieving sustainable development in India?

Q36. Explain three causes of soil erosion in the north-eastern parts of India.

Q37. How does deforestation lead to soil erosion and land degradation? Explain with examples.

Q38. Explain the concept of 'Net Sown Area' and 'Land under Forests' in India's land use pattern.

Q39. What are the characteristics of red and yellow soil? Where are they found in India?

Q40. Explain any three ways in which resource planning ensures balanced regional development in India.

Q41. How does the over-use of chemical fertilisers and pesticides contribute to land degradation in India?

Q42. Explain the significance of Agenda 21 for developing countries like India.

Q43. Why is conservation of soil important? Explain three specific reasons.

SECTION C - 5 MARKS

Q1. Describe the measures to control soil erosion in India. (PYQ 2023)

Q2. Explain the classification of resources on the basis of origin and exhaustibility with examples. (PYQ 2022)

Q3. Explain the classification of resources on the basis of ownership with examples of each type. (PYQ 2024)

Q4. Explain any five human activities responsible for land degradation in India. Also suggest two measures to check it. (PYQ 2021)

Q5. Describe the characteristics and distribution of alluvial soil in India. Why is it important for agriculture?

Q6. Describe the characteristics and distribution of black soil in India. Why is it called regur soil?

Q7. Describe the characteristics and distribution of laterite soil. What are its limitations for agriculture?

Q8. "Resource planning is essential for sustainable development in India." Justify with five points. (PYQ — frequently repeated)

Q9. Explain the three stages of resource planning in India. Why is technology and skill important in each stage?

Q10. "India has enormous diversity in the availability of resources but their distribution is uneven." Explain with five examples. (PYQ)

Q11. Explain the problems created by over-exploitation and indiscriminate use of natural resources. What are the consequences for the environment and society?

Q12. Describe the land use pattern of India. Why has the pattern changed over the last few decades?

Q13. Explain any five measures to conserve soil in India with reference to different regions and types of soil erosion.

Q14. How does soil formation take place? Explain the factors responsible for soil formation and give examples.

Q15. "Sustainable development requires a balance between resource use and conservation." Discuss with reference to Gandhiji's views and the Rio Earth Summit 1992.

Q16. Explain how mining, over-irrigation, deforestation, and overgrazing have together caused severe land degradation in different states of India.

Q17. Classify all types of resources on four different bases — origin, exhaustibility, ownership, and status of development — with one example of each. (PYQ 2014)

Q18. Explain the importance of soil as a resource. Describe the different types of soil found in India and their uses.

Q19. Describe five different methods used to control soil erosion in plains and hilly areas of India.

Q20. "Technology, institutions and human beings together transform materials into resources." Justify this statement with five examples. (PYQ)

Q21. How does land degradation occur due to both natural and human causes? Suggest five measures to check it in different regions of India.

Q22. Describe the distribution and characteristics of arid soil. How can it be made useful for cultivation?

Q23. "A nation's development depends on its resource base." Discuss this statement with reference to India's resource diversity and uneven distribution.

Q24. Explain the concept of sustainable development. How does resource planning contribute to achieving it in India?

Q25. Describe the various categories of land use in India. How has urbanisation and industrialisation affected the land use pattern over the decades?

Q26. Explain the role of the Rio de Janeiro Earth Summit and Agenda 21 in shaping global and Indian resource conservation policies.

Q27. Describe the importance of resource conservation. How can individuals, communities, and the government contribute to conserving resources?
