

Ch 2: Forest and Wildlife Resources

Question Bank | 2M | 3M | 5M

SECTION A - 2 MARKS

- Q1. What is biodiversity? What percentage of world species does India have?**
- Q2. What is flora? What is fauna? Give one example of each.**
- Q3. What are normal species? Give two examples.**
- Q4. What are endangered species? Give two examples. (PYQ 2014)**
- Q5. What are vulnerable species? Give two examples. (PYQ 2012)**
- Q6. What are rare species? Give two examples. (PYQ 2012)**
- Q7. What are endemic species? Give two examples.**
- Q8. What are extinct species? Give two examples.**
- Q9. What are Reserved Forests? Which state has the maximum area under reserved forests?**
- Q10. What are Protected Forests? What fraction of total forest area do they cover?**

Q11. What are Unclassed Forests? Who manages them?

Q12. What is the Indian Wildlife Protection Act? When was it passed? (PYQ)

Q13. What is Project Tiger? When was it launched and why?

Q14. What is a Biosphere Reserve? Give two examples from India.

Q15. What is a Wildlife Sanctuary? How is it different from a National Park? (PYQ Delhi SQP 2022)

Q16. What are Sacred Groves? Which tribal communities practice them? (PYQ 2024)

Q17. What is the Chipko Movement? Where did it begin?

Q18. What is the Beej Bachao Andolan? Where was it launched?

Q19. What is Joint Forest Management? When was it introduced in India?

Q20. Name any two factors that have led to the decline of India's biodiversity.

Q21. Which measures can be taken to mitigate threats to tiger population and biodiversity? (PYQ SQP 2023)

Q22. How has dolomite mining threatened the Buxa Tiger Reserve in West Bengal?

Q23. What are the three main characteristics of the Indian Wildlife Protection Act? (PYQ)

Q24. Name two animals found freely in and around Bishnoi villages in Rajasthan. Why are they protected?

Q25. What is the 'Bhairodev Dakav Sonchuri'? Where and by whom was it declared?

Q26. What percentage of India's geographical area should ideally be under forests as per the National Forest Policy 1952?

Q27. What is 'Navdanya'? What is its objective?

Q28. Name two examples of how tribal communities in India have traditionally conserved forests.

Q29. How has large-scale development affected forest cover in India since 1951?

Q30. "The destruction of forests and wildlife is not just a biological issue but also a cultural one." Give two points to support this. (PYQ Delhi SQP 2022)

Q31. What are the non-timber forest products? Why are they important for forest communities?

SECTION B - 3 MARKS

Q1. Explain the classification of forests in India on the basis of administration. (PYQ)

Q2. Distinguish between endangered species and vulnerable species. Give two examples of each. (PYQ)

Q3. Distinguish between rare species and endemic species. Give two examples of each. (PYQ)

Q4. Explain three causes that have led to the depletion of forests and wildlife in India.

Q5. Describe three adverse impacts of dolomite mining on the Buxa Tiger Reserve ecosystem. (PYQ)

Q6. Explain three examples of conservation of biodiversity at the community level in India. (PYQ 2025)

Q7. "The biological loss from destroying forests is strongly correlated with the loss of cultural diversity." Explain with three examples. (PYQ Delhi SQP 2022)

Q8. Explain the significance of Sacred Groves in forest conservation in India. Give examples. (PYQ 2024)

Q9. Describe the role of the Chipko Movement in forest conservation.

Q10. Explain what Joint Forest Management is. What benefits do local communities get from it?

Q11. Why is it important to conserve forests and wildlife? Explain three reasons.

Q12. Describe three steps taken by the government to protect species from extinction. (PYQ)

Q13. Explain three ways in which forests contribute to maintaining ecological balance.

Q14. How have large-scale development projects accelerated the loss of forests in India? Give three examples. (PYQ)

Q15. Explain the role of the Indian Wildlife Protection Act 1972 in protecting wildlife. Mention three key provisions.

Q16. Describe three measures that can be taken to conserve forest and wildlife resources in India.

Q17. How do grazing and fuelwood collection lead to deforestation in India? (PYQ 2013)

Q18. Explain how the inhabitants of Alwar district, Rajasthan, conserved forests through community participation.

Q19. Distinguish between a National Park and a Wildlife Sanctuary. Give two examples of each.

Q20. What are Biosphere Reserves? How do they help in conservation of biodiversity? Give two examples.

Q21. Explain three ways in which the rich consume more resources and cause more ecological damage than the poor. (PYQ 2013)

Q22. How has Project Tiger helped in the conservation of tigers in India? Describe three outcomes.

Q23. Explain how nature worship and tribal beliefs have helped in conserving forests in India.

Q24. Describe the Beej Bachao Andolan and Navdanya movement. How do they contribute to conservation?

Q25. What are the environmental values of forests? Explain why 33% of area should be under forests. (PYQ)

Q26. Explain three human activities that have caused environmental destruction and habitat loss in India.

Q27. How have unequal access and inequitable consumption of resources led to environmental degradation? Explain with three points.

Q28. Explain the significance of non-timber forest products for tribal and forest-dwelling communities.

Q29. Describe how the Sariska Tiger Reserve in Rajasthan became an example of successful community-based conservation.

Q30. What is the difference between Reserved Forests and Protected Forests? Which is more important for conservation and why?

Q31. Explain the meaning of sustainable forest management. How does it differ from commercial exploitation of forests?

Q32. Describe the role of women in forest conservation movements in India. Give two examples.

Q33. Explain three ways in which forests support livelihoods of rural and tribal communities in India.

Q34. How does loss of biodiversity affect human beings? Explain with three specific impacts.

Q35. What is the importance of genetic diversity in plants and animals? How does conservation help maintain it?

Q36. Describe how environmental pollution and forest fires have contributed to depletion of forests and wildlife.

Q37. Explain three characteristics of the Indian Wildlife Protection Act that make it an effective conservation tool.

Q38. How do National Parks differ from Biosphere Reserves in terms of objectives, restrictions, and management?

Q39. Explain how biodiversity loss affects food security and agriculture in India.

Q40. Describe the significance of the Andaman and Nicobar Islands as a biodiversity hotspot in India.

Q41. Explain the role of International conservation organisations in protecting India's wildlife. Give two examples.

Q42. How have development projects like dams, roads, and mining damaged wildlife corridors in India?

Q43. Explain any three measures that can help in the regeneration of degraded forests in India.

SECTION C - 5 MARKS

Q1. Read the passage on Sacred Groves and answer: What are Sacred Groves? How do tribal beliefs help in their conservation? Give examples from different regions of India.

(PYQ 2024 source-based)

Q2. Explain the various categories into which existing species of plants and animals are classified. Give two examples of each category. *(PYQ — frequently repeated)*

Q3. "The destruction of forests and wildlife is not just a biological issue. Biological loss is strongly correlated with loss of cultural diversity." Explain with five examples. *(PYQ Delhi SQP 2022)*

Q4. Describe the classification of forests in India based on administrative status. Why is this classification important for conservation?

Q5. Explain the factors that have led to large-scale depletion of forests and wildlife resources in India. Suggest five measures to check it.

Q6. Describe the steps taken by the government post-independence to conserve forests and wildlife. Explain five specific measures. *(PYQ)*

Q7. Explain the role of communities in forest and wildlife conservation in India. Give five examples of community-based conservation efforts.

Q8. "India is one of the world's richest countries in terms of biological diversity but this diversity is under serious threat." Justify with five points covering both the richness and threats.

Q9. Explain how large-scale developmental projects have accelerated the loss of forest cover in India since independence. What has been done to address this?

Q10. Describe the importance of forests for ecological balance, biodiversity, livelihoods, and climate regulation. Explain five points.

Q11. What is Joint Forest Management? Explain how it works and what benefits it provides to both the forest and the local community. Give examples from India.

Q12. Explain the significance of Biosphere Reserves, National Parks, and Wildlife Sanctuaries in India's conservation strategy. How are they different from each other?

Q13. "Community participation is the most effective way to conserve forests and wildlife." Justify this with five examples from different parts of India.

Q14. Explain how the Indian Wildlife Protection Act 1972 has helped in protecting India's biodiversity. What are its key provisions and limitations?

Q15. Describe the threats faced by India's forests due to mining, dam construction, agriculture expansion, and industrial development. Suggest five conservation measures.

Q16. Explain the concept of sustainable use of forest resources. How can the needs of forest communities be balanced with conservation goals?

Q17. How does the loss of biodiversity threaten India's food security, water supply, and climate stability? Explain with five specific examples.

Q18. Describe the Chipko Movement. What were its causes, methods, achievements, and long-term impact on forest policy in India?

Q19. "Forests are not just a resource but a life support system." Justify this statement by explaining the ecological, economic, and social value of forests with five points.

Q20. Explain the role of sacred forests, sacred groves, and community conservation areas in India in protecting biodiversity outside government-protected areas.

Q21. Describe the history and outcomes of Project Tiger in India. Has it been successful? What challenges remain?

Q22. How do developed countries and rich classes consume more resources and cause more ecological damage than developing countries and the poor? Explain with five examples.
(PYQ 2013)

Q23. Explain the role of traditional knowledge and indigenous practices of tribal communities in conserving India's biodiversity. Give five examples.

Q24. How has uncontrolled and inequitable resource use led to environmental degradation in India? What steps can ensure more equitable and sustainable resource use?

Q25. Describe the characteristics of India's major forest types tropical evergreen, tropical deciduous, and mountain forests. How do they contribute to India's biodiversity?
