

Ch 6: Manufacturing Industries

Question Bank | 2M | 3M | 5M

SECTION A - 2 MARKS

Q1. What is manufacturing? To which sector of the economy does it belong?

Q2. What are basic or key industries? Give two examples.

Q3. What are consumer industries? Give two examples.

Q4. What are agro-based industries? Give two examples.

Q5. What are mineral-based industries? Give two examples.

Q6. Classify industries on the basis of raw materials used. Give one example of each. *(PYQ Term-2 2022)*

Q7. What are agglomeration economies? Why do industries cluster around urban centres?

Q8. Why is the manufacturing sector called the backbone of economic development? Give two points. *(PYQ 2021)*

Q9. Why is the iron and steel industry called a basic or key industry? *(PYQ Term-2 2021-22)*

Q10. Why is the iron and steel industry called a heavy industry? Give two reasons.

Q11. What is the major difference between integrated steel plants and mini steel plants? (PYQ 2011)

Q12. Name the public sector body that markets steel on behalf of all public sector steel plants.

Q13. Why are most iron and steel industries concentrated around the Chota Nagpur Plateau? Give two reasons. (PYQ 2015, 2014, 2012)

Q14. What is the ratio of raw materials — iron ore, coal, and limestone — used in steel production?

Q15. Where was the first cotton textile mill set up in India? In which year?

Q16. Why did the cotton textile industry first develop in Maharashtra and Gujarat? Give two reasons.

Q17. Name any two problems faced by the cotton textile industry in India. (PYQ)

Q18. Name any two problems faced by the jute industry in India. (PYQ)

Q19. Where was the first jute mill set up in India? In which year?

Q20. Why are sugar mills located close to sugarcane fields? (PYQ 2016)

Q21. Why have sugar mills been shifting towards Maharashtra and South India? (PYQ)

Q22. What are the major challenges faced by the sugar industry? Name any two. (PYQ 2016)

Q23. Name any four agro-based industries and four mineral-based industries.

Q24. What is the electronic capital of India? Name two other major IT cities.

Q25. Name two factors that contributed to the growth of the automobile industry in India. (PYQ 2011)

Q26. Name two centres of the automobile industry in India. (PYQ 2011)

Q27. What is the role of IT and electronics industry in India's development? (PYQ 2024)

Q28. "Industrialisation and urbanisation go hand in hand." Give two supporting points. (PYQ)

Q29. Name two measures to control industrial air pollution. (PYQ)

Q30. Name two measures to control industrial water pollution.

Q31. What is the basic raw material for the cement industry? Name two states where cement is produced.

Q32. Name two public sector iron and steel plants in India and the states where they are located.

SECTION B - 3 MARKS

Q1. "Agriculture and industry move hand in hand." Support with three examples. (PYQ 2023)

Q2. Why is the iron and steel industry called the basic industry? Explain three reasons. (PYQ 2021-22)

Q3. Classify industries on the basis of raw materials, ownership, and main role. Give one example of each. (PYQ Term-2 2022)

Q4. Explain any three factors responsible for the location of industries in India. (PYQ — frequently asked)

Q5. Why are most iron and steel plants located in the Chota Nagpur Plateau region? Explain three reasons. (PYQ 2015, 2014, 2012)

Q6. Explain three major problems faced by the iron and steel industry in India. (PYQ 2025-26 trend)

Q7. Describe the factors responsible for the concentration of jute mills along the Hooghly river. (PYQ 2014, 2012)

Q8. Explain three problems faced by the jute industry in India. (PYQ)

Q9. Explain three problems faced by the cotton textile industry in India. (PYQ)

Q10. Why was the cotton textile industry first established in Maharashtra and Gujarat? Explain three reasons. (PYQ)

Q11. Explain the differences between the spinning and weaving sectors of the cotton textile industry.

Q12. Why are sugar mills concentrated in sugarcane-producing areas? Explain three reasons. (PYQ 2016)

Q13. Explain the major challenges faced by the sugar industry in India. (PYQ 2016)

Q14. Why have sugar mills been shifting and concentrating in Maharashtra and southern states? Explain three reasons.

Q15. Explain the role of the IT and electronics industry in transforming India's development process. (PYQ 2024)

Q16. Explain the role of agro-based industries in the Indian economy. Give three points.

Q17. Explain any three factors that have contributed to the growth of the IT industry in India.

Q18. How do industries pollute the environment? Explain three types of pollution caused by industries.

Q19. Explain three measures to control industrial pollution and make industries more environment-friendly.

Q20. "The manufacturing sector is considered the backbone of economic development." Support with three examples. (PYQ 2021)

Q21. Explain the importance of the cotton textile industry to the Indian economy. Give three points.

Q22. Explain the significance of the National Jute Policy 2005. What are its objectives? (PYQ 2013)

Q23. Explain why the jute industry in India is facing stiff competition from other countries. Name three competitor nations.

Q24. Explain three ways in which manufacturing industries contribute to India's foreign exchange earnings.

Q25. How does industrial location near raw materials improve the efficiency and reduce the cost of production? Give two examples.

Q26. Explain the difference between public sector, private sector, and cooperative sector industries with one example each.

Q27. Explain how the cement industry has grown in India. What are its uses and which states are major producers?

Q28. Explain the importance of the fertiliser industry in India. How does it support agriculture?

Q29. Explain three reasons why industries tend to cluster near urban centres and what advantages they gain.

Q30. Describe the distribution of the sugar industry in India. Which states have the maximum number of mills and why?

Q31. Explain how liberalisation and FDI have impacted the iron and steel industry in India.

Q32. How does the development of manufacturing industries help in reducing regional disparities in India? Explain three points.

Q33. Explain the role of the automobile industry in India's economic development. Name two major centres.

Q34. Explain how waste and effluents from manufacturing industries can be managed to reduce environmental damage.

Q35. Describe three characteristics of the textile industry that make it self-reliant and important to the Indian economy.

Q36. Explain how the IT industry has boosted India's GDP, employment, and global reputation. (PYQ 2024)

Q37. Explain why production and consumption of steel is regarded as the index of a country's development.

Q38. Explain three steps that can be taken to make Indian industries internationally competitive.

Q39. Describe the distribution and growth of the cotton textile industry in India across different states.

Q40. Explain the relationship between industrial development and urbanisation with examples from India.

Q41. Explain the importance of small-scale and cottage industries in India. Give examples from Firozabad, Moradabad, and Varanasi.

Q42. Describe any three ways in which industries can practise sustainable development to reduce environmental damage.

Q43. How does the chemical industry support both agriculture and manufacturing in India? Explain three links.

SECTION C - 5 MARKS

Q1. "The development process of India has experienced transformation due to the significant influence of the IT and Electronics industry." Explain with five examples. (PYQ 2024)

Q2. "Agriculture and industry move hand in hand in India." Justify this statement with five detailed examples showing the interdependence of the two sectors. (PYQ 2023)

Q3. Why is the iron and steel industry called the basic industry? Describe its distribution in India. Why is it concentrated in the Chota Nagpur Plateau region? (PYQ 2021-22, 2015, 2012)

Q4. "The manufacturing sector is considered the backbone of economic development of a country." Support this statement with five examples covering employment, exports, agriculture, and national income. (PYQ 2021)

Q5. Explain the factors responsible for the location of jute mills in the Hooghly basin. What are the challenges faced by the jute industry and what steps has the government taken to address them? (PYQ 2014, 2013)

Q6. Describe the cotton textile industry in India. Explain its importance, distribution, problems faced, and the difference between the spinning and weaving sectors.

Q7. Describe the sugar industry in India. Explain its distribution, why mills are located near fields, why they are shifting southwards, and the major challenges faced. (PYQ 2016)

Q8. Classify industries on five different bases — raw material, ownership, main role, capital investment, and bulk of material — with two examples of each.

Q9. Explain the factors that influence the location of industries in India. Give examples of at least five factors with specific industries.

Q10. How do manufacturing industries cause environmental pollution? Describe air, water, land, and noise pollution caused by industries. Suggest five measures to control industrial pollution.

Q11. Describe the growth, distribution, and importance of the IT industry in India. Why has Bengaluru emerged as the electronic capital? What has been the impact on India's economy and employment?

Q12. Explain the importance of the textile industry to India's economy. How does it support farmers, workers, and exporters? What are the main challenges it faces?

Q13. Compare the iron and steel industry of India with its potential. Why is India not able to fully realise its potential despite being a major producer? Suggest five measures.

Q14. "Industrial development is a precondition for eradication of unemployment and poverty in India." Justify with five points.

Q15. Explain how the Make in India initiative and FDI have impacted the growth of manufacturing industries in India. Give five examples from different sectors.

Q16. Describe the cement industry in India — its importance, raw materials, distribution, and how it supports infrastructure development.

Q17. Explain the role of agro-based industries in transforming India's agricultural economy. Discuss cotton, sugar, and jute industries with their importance, challenges, and government measures.

Q18. How does the location of raw materials affect the efficiency of manufacturing industries? Explain with five examples from iron and steel, cotton, jute, sugar, and cement industries.

Q19. Explain how manufacturing industries contribute to India's foreign exchange earnings. Which industries are the top contributors and what are the challenges they face in international markets?

Q20. Describe the automobile industry in India. What factors have contributed to its growth? Name major centres and explain its forward and backward linkages with other industries.

Q21. "The economic strength of a country is measured by the development of its manufacturing industries." Justify this statement with five arguments covering GDP, employment, exports, and self-reliance.

Q22. Describe the challenges faced by the iron and steel, cotton textile, sugar, and jute industries in India. Suggest two measures for each industry to improve its performance.

Q23. How has globalisation impacted Indian manufacturing industries? Explain the positive and negative effects with five examples from different sectors.

Q24. Explain the concept of sustainable industrial development. What measures can industries take to balance economic growth with environmental conservation?

Q25. Describe the growth and importance of the chemical and fertiliser industries in India. How do they support agriculture and other manufacturing sectors?
